

FAAC Simulator Products: Mobile Systems

TRAINING TRAILER

Area 14 Kentucky State Fire Rescue Training 45' Fifth Wheel Trailer

Mobile versions of FAAC's simulators are available in a variety of configurations ranging from a fifth-wheel trailer towed by a pickup truck to a 53-foot tractor-trailer. All are fully self-contained and equipped with power, air conditioning, and heating.

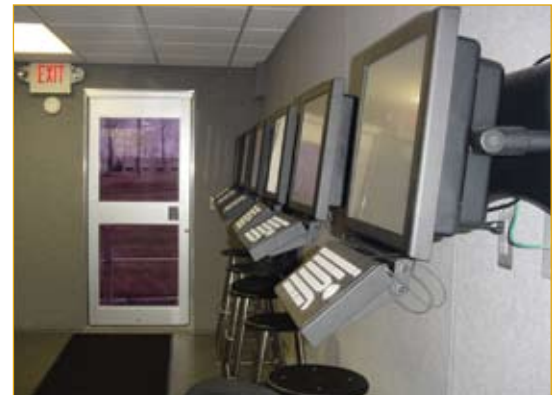

Mobile systems take training to the student and eliminate travel expenses and the need for permanent facilities.

Customization is the key to creating an effective mobile trainer. FAAC staff members listen to YOUR needs and then configure a system that meets them.

MOBILE SIMULATOR SYSTEMS

Paducah Area Transit System 53' Tractor Trailer. Paducah's classroom houses three driving simulators and a CBT training area.
