

# **DRIVING FORCE**

Rapid Breathing, Increased Heart Rate, Adrenaline Rush,  
Focus... Focus... All part of the job...  
all part of the Training  
**DRIVINGFORCE**

## **DRIVE. SHOOT. DRIVE.**

Industry leaders in driver training simulation (FAAC Incorporated) and Force Options Simulation (MILO Range) have combined products to provide a Drive-and-Shoot training capability. The officer's training experience is now more realistic and relates more closely to patrol duties. Officers do exactly the same things in the training room that they do on duty.

Nothing more closely matches the scenarios officers face during a patrol cycle than the compressed situational dynamics of a Driving Force training exercise.

# DRIVING FORCE

The Only Fully Integrated  
Driving and Force Options Simulator

## DRIVING FORCE / FAAC INCORPORATED ONE COMPANY / ONE COMBINED TRAINING SOLUTION

- Fully Integrated Training Scenarios
- Device-to-Device Networking
- Scene Matching
- Event Auto-Start
  - Simulator Started by Triggering Event in Complementary Simulator
- Agency Level Authoring
  - Combined Training Scenarios Easily Developed with Authoring Software
- Best in Start to-End-Training Cycles
- Compression of Situational Dynamics
- Opportunity to Choose Incorrectly
- 24/7 Practice
- Tailored Instructional Sessions
- Objective and Repeatable Training Sessions
- Instructors can replay / remediate deficiencies

Render complex decisions and engage in intricate responses under conditions of time pressure, high stakes, and stress-induced physical discomfort.

Officers do exactly the same things in the training room that they do on duty: Receiving and responding to a call in their patrol car, conducting an investigation, a field interview, making a simulated arrest, or even implementing a level of force necessary to gain compliance from a subject. The most valuable component of this combined training is that it takes the officer from the beginning to the end of the call in a single training exercise.
