

# MENTAL HEALTH RESPONSE TRAINING SYSTEM

MISSION-SPECIFIC. MISSION-ADAPTABLE. MISSION-EFFECTIVE.

The MILO Range Mental Health Response Training System offers the most advanced feature set available for interactive judgment training for mental health professionals. No other system can deliver a more realistic, adaptable training environment to your mission.

In addition to ready-to-train scenarios, an extensive library of interactive exercises is included ranging from simple diagnostic drills to advanced judgment and decision-making applications. Optional MILO Course Designer software empowers instructors to create new, fully interactive video scenarios allowing them to apply their policies and procedures in a familiar environment.

All from a company with 25 years of simulation experience and backed by our 24/7 technical support, the MILO Range Mental Health Response Training System makes it easy to create a safe, reliable, and effective training program.

HD mental health video scenarios offer full emotional immersion with multiple branching decisions and outcomes

Easy to Use: Intuitive MILO interface based on Windows Operating Software

Instructor-controlled response options (verbal recognition, force applications, escalation/de-escalation)

## MISSION FOCUS: MENTAL HEALTH RESPONSE

The more realistic the training, the more effective the results, that's why MILO Range supports a host of system features that you can use to simulate virtually any scenario.

Available on the following fully portable platforms: MILO Range Classic, Advanced, and MSATS systems

### System Features

- Complete system in one case
- Instructor-controlled multi-branching response options
- Intuitive Windows-based Instructor Interface
- Safe, simulated laser-based force options
- Marksmanship and interactive graphics-based firearms drills
- Full training records & reporting module

### Training, Warranty & Support

- One day Train-the-Trainer MILO instruction at your site
- One and 2-year full-coverage warranty included
- Expanded yearly coverage available
- 24/7 telephone support
- Free software updates and new scenarios as they are produced

### Examples of mental health situations include:

- Welfare check - meds, etc.
- Autism spectrum
- Homeless encampment
- Disturbance in a public place
- PTSD
- Suicidal subject

"We use the MILO interactive simulator in our statewide Mental Health/Crisis Intervention training course. This is a 16-hour POST-certified, legislatively mandated training course. One of the outstanding, and most appreciated aspects, of the system, is the MILO Course Design software. This software provides the ability to edit existing scenarios to better accomplish agency-specific training goals. The user-friendly and intuitive nature of this software has enabled us as a training unit to storyboard, film, and create multiple scenarios based upon recent events and departmental policies and protocols. These scenarios allow for the full spectrum of force options, but more importantly, the scenarios allow for complex conversational branching with the goal of voluntary cooperation and compliance. The MILO allows for a repeatable, standardized training scenario that allows the student to be corrected and learn in a high stake/low-risk environment." - End-User, Large CA Agency
