MILO VIRTUAL
SIMULATION TRAINING SYSTEMS

MILO Virtual is a simulation training systems provider for military, government, and law enforcement agencies for critical incident, de-escalation, decision support, traditional tactical judgment, and firearms proficiency training. With simulations, reality-based training, and mission-specific interactive judgment training, MILO Virtual can meet your robust training needs — any time, anywhere, any space, any place. From the portable MILO Range M-SATS (Mobile-Situational Awareness Training System) to the fully immersive MILO Range Theater and Shoot House systems, MILO Virtual provides hundreds of complex dynamic video training scenarios, graphics-based firearms skill-builder drills, and industry-leading tactical training features. MILO Virtual is your team in the center, focused on virtual integration with live and cognitive divisions to the left and right.

WHY CHOOSE US?

We continuously improve our capabilities and collaborate with the best-in-class industry providers for integrated solutions that enable the highest quality and most adaptive virtual training solutions. We invest time in understanding your needs and policies upfront and work closely with your team to develop and deliver the appropriate training solution.

Training systems can be as simple as a single-screen simulator or, as complex as a fully immersive 300° surround theater.

Any system can be customized with firearm recoil kits, live-fire/laser options, shoot-back systems, and more. Lethal and non-lethal weapon options available.

MILO Range Systems include skill-focused modes, with a variety of CGI live-action exercises and interactive HD video role-play scenarios. HD video scenarios offer full emotional immersion with multiple branching decisions and outcomes.
