HEALTHCARE SECURITY TRAINING SYSTEM

MISSION–SPECIFIC. MISSION–ADAPTABLE. MISSION–EFFECTIVE.

The MILO Healthcare Security Training System offers the most advanced feature set available for interactive judgment training for Healthcare Security situations. No other system can deliver a more realistic, adaptable training environment to your mission.

In addition to ready-to-train scenarios, an extensive library of interactive exercises is included ranging from simple diagnostic drills to advanced judgment and decision-making applications. Optional MILO Course Designer software empowers instructors to create new, fully interactive video scenarios allowing them to apply their policies and procedures in a familiar environment.

All from a company with 25 years of simulation experience and backed by our 24/7 technical support, the MILO Range Healthcare Security Training System makes it easy to create a safe, reliable, and effective training program.

HD Healthcare Security video scenarios offer full emotional immersion with multiple branching decisions and outcomes

Easy to Use: Intuitive MILO interface based on Window Operating Software

Instructor-controlled response options (verbal recognition, force applications, escalation/de-escalation)

MISSION FOCUS: HEALTHCARE SECURITY

MILO's Healthcare Security and Safety scenarios have been critical in meeting the training needs of Police Officers and Security Officers charged with protecting citizens during some of their most vulnerable times. Time spent at the hospital can be uncertain and stressful, and these training scenarios are specifically designed to train officers to help people through those situations.

The more realistic the training, the more effective the results, that's why MILO Range supports a host of system features that you can use to simulate virtually any scenario.
Available on the following fully portable platforms: MILO Range Classic, Advanced, and MSATS systems
