MILO

PROBATION AND PAROLE TRAINING SYSTEM
MISSION–SPECIFIC. MISSION–ADAPTABLE. MISSION–EFFECTIVE.

The MILO Probation and Parole System offers the most advanced feature set available for interactive judgment training for Probation and Parole situations. No other system can deliver a more realistic, adaptable training environment to your mission.

In addition to ready-to-train scenarios, an extensive library of interactive exercises is included ranging from simple diagnostic drills to advanced judgment and decision-making applications. Optional MILO Course Designer software empowers instructors to create new, fully interactive video scenarios allowing them to apply their policies and procedures in a familiar environment.

All from a company with 25 years of simulation experience and backed by our 24/7 technical support, the MILO Range Probation and Parole Training System makes it easy to create a safe, reliable, and effective training program.

HD Probation and Parole video scenarios offer full emotional immersion with multiple branching decisions and outcomes

Easy to Use: Intuitive MILO interface based on Windows Operating Software

Instructor-controlled response options (verbal recognition, force applications, escalation/de-escalation)

MISSION FOCUS: PROBATION AND PAROLE

MILO's Probation scenarios are created with guidance from, and filmed at the United States Pre-Trial and Probation Academy in Charleston, South Carolina. These unique scenarios were created with the unique mission of the Probation Officer in mind, and meet all current Academy training objectives for scenario based virtual training. MILO's Probation scenario library contains 80 scenarios created specifically to address the specific training goals and situations that Probation Officers face on a day to day basis.

The more realistic the training, the more effective the results, that's why MILO Range supports a host of system features that you can use to simulate virtually any scenario.

Available on the following fully portable platforms: MILO Range Classic, Advanced, and MSATS systems

System Features

- Complete system in one case
- Instructor–controlled multi-branching response options
- Intuitive Windows-based Instructor Interface
- Safe, simulated laser-based force options
- Marksmanship and interactive graphics-based firearms drills
- Full training records & reporting module

- Free software updates and new scenarios as they are produced

Examples of corrections/in–custody situations include:

- Home Visits
- Employment Visits

- Urinalysis screenings
- Courtroom Incidents

- 3rd Party Incidents
- Implicit bias

"The goal of using a MILO simulator is to help train staff to accomplish voluntary compliance where possible through verbal CDT (communication, de-escalation of threats) rather than use-of-force. It also highlights the "signs and symptoms of mental illness, developmental disabilities, and cognitive deficits."

- **Spokesperson, Large State Corrections Agency**
